Professional Summary

Computer Science undergraduate with hands-on product management and full-stack development experience across AI-powered consumer products. Skilled in user research, PRD writing, A/B experimentation, and feature prioritization. Built and shipped products used by real users; comfortable leading cross-functional collaboration at the intersection of product, design, and engineering.

Work Experience

BharatPe

Dec 1, 2025 – Jan 3, 2026

Product Management Intern

Gurugram, India

- Analyzed user behavior across UPI usage, transaction history, and SMS-derived signals to build 6 behavioral personas, enabling personalized home-screen experiences and feature prioritization for distinct user segments.
- Authored a PRD for dynamic home-screen personalization covering logic flows, 12+ edge cases, and analytics instrumentation; PRD was approved by the product lead and picked up by engineering, targeting 15–20% uplift in CTR and feature adoption.
- Designed auto-profile detection logic using historical transaction data and behavioral signals to automatically classify users into personas without manual input.
- Defined a Mixpanel-based analytics instrumentation spec within the PRD, documenting specific events, metrics, and tracking logic to measure persona classification accuracy and feature adoption post-launch.

Wadhvani AI

Jul 1, 2025 – Jul 31, 2025

UI/UX Design Intern

New Delhi, India

- Applied usability principles and user flow design through hands-on Figma prototyping.
- Iterated on 10+ high-fidelity screens based on feedback, improving interface clarity and usability.
- Conducted usability tests and translated observations into design improvements.

Randomize MUJ

Nov 2024 – Present

Junior Working Team Member

Jaipur, India

- Developed the annual hackathon microsite to host problem statements and manage student participation, enabling smoother event operations.
- Co-organized club hackathons, managing participant coordination, logistics, and on-ground execution to ensure smooth event delivery.

Projects

Uber: One-Tap Reliable Ride for Daily Commuters | UX & Product Design Case Study | Android

- Identified a recurring friction point for daily commuters rebuilding the same trip every time and designed a context-aware, ready-to-confirm ride experience to cut unnecessary steps in the repeat-booking flow.
- Conducted user research across both rider and driver perspectives, iterating through multiple design versions to resolve visual hierarchy issues and improve trust signal placement.

MindfulAI: Mental Health Companion Platform | Python, Flask, JavaScript, Together AI API, SheetDB.io Internal Hackathon | Ranked 4th / 60 teams | Led 3-person team as product owner

- Conducted competitor research across 5+ mental health platforms to identify an opportunity for a unified companion product combining assessment, mood tracking, journaling, meditation resources, and AI-driven support.
- Led a 3-person team across feature prioritization, design, and development to build MindfulAI, which ranked 4th out of 60 teams at an internal hackathon.

Major Project Management System (MPMS) | *React 18, Node.js, Express, JWT, Tailwind CSS Full-stack PBL workflow platform designed for ~8,000–9,000 B.Tech students & faculty at MUJ*

- Built a role-based workflow platform for Students, Mentors, Faculty, and Admins with JWT authentication, password hashing, rate limiting, and secure access controls across all user types.
- Engineered solutions for 12+ workflow edge cases including evaluation locks, mentor allocation conflicts, and permission-based actions; reduced manual coordination across PBL processes.
- Developed 8 backend modules covering mentor allocation, tasks, diary, meetings, evaluations, presentations, announcements, and CSV exports, centralizing key PBL workflows for ~8,000–9,000 students and faculty at MUJ.

URL Shortener | *Python, Flask, Streamlit, Google Apps Script, Heroku*

- Built a custom URL shortening service from scratch with alias generation and duplicate ID detection, using Google Sheets as a lightweight database via the Gviz API and deploying it on Heroku.

Sneaker Store Website | *HTML, CSS, JavaScript*

- Built an e-commerce website with product listings, filtering, and cart functionality, winning 1st place and a cash prize at an inter-school web design competition at DPS Bhopal.

Skills

Languages: Python, JavaScript, C, HTML, CSS

Frameworks & Tools: React.js, Node.js, Express, Flask, Streamlit, Tailwind CSS

AI & APIs: OpenAI API, Together AI API, Google Apps Script

Product & Design: PRD Writing, A/B Testing, User Research, Wireframing, Figma, Mixpanel

Systems & Tools: Git, GitHub, SQL, Jira

Education

Manipal University Jaipur

2024 – 2028

Bachelor of Technology (BTech) Computer Science
Completed First Year (CGPA – 8)

Delhi Public School, R.K. Puram

May 2014 – May 2024

Science Stream

- Class X: 90.6%
- Class XII: 84.8%

Certifications

- Red Hat System Administration II (RH134 – RHA) Ver. 9.3 — Red Hat, Mar 2026
- Red Hat System Administration I (RH124 – RHA) Ver. 9.3 — Red Hat, Feb 2026
- Programming, Data Structures & Algorithms using Python — NPTEL, IIT Madras, Jul–Sep 2025

Achievements

- **1st Place**, CYNOC v8.0 Hackathon (2022), DPS Bhopal | Web Design & Development track, outperformed 50+ teams
- **Finalist**, MIT App Inventor Appathon for Good (2021) | Selected among top teams internationally
- **Scholar Badges:** Blue Blazer, Green Blazer, Blue Badge, Green Badge | Academic & co-curricular excellence
